

The future of crematory management, all in the palm of your hand.

Introducing the only **Case Management Tracking System** that synchronizes Bar Code technology, SRS Crematory Manager and the **M-pyre™** Advanced PLC Control Panel.

Program Highlights:

- * Validates Documentation
- * Enhances Procedural Control
- * Insures Accountability
- * Targets Accuracy
- * Reduces Liability Risk
- * Applicable to both Human & Animal Operations

Stage 1: Receiving

Stage 2/3: Cold Storage

Stage 4/5: Cremation

Stage 6: Processing

Stage 7: Return

SecurIDy™ Cremation Tracking System

For over 50 years, **Matthews Cremation** has symbolized the *Standard of Excellence* in Cremation Solutions. With over 3,500 installations in over 50 countries, our leadership, expertise and endless commitment to our client's success are the reason funeral professionals around the world proudly identify Matthews Cremation as the only choice for their Human and Animal crematory needs. Our creation of the SecurIDy™ cremation tracking system, symbolizes the depth of our commitment to the cremation industry and the protection of our valued clients.

SOFTWARE FEATURES & BENEFITS:	
ORGANIZATION:	Improves operational efficiencies by incorporating case load data with document generation, form letter creation, accounting, billing and process tracking.
PROCESS TRACKING:	Bar code system synchronizes directly with your case management files, documenting date/time & personnel who handles each phase of the cremation service. Provides "real time" awareness of what stage the body is in process.
EQUIPMENT INTERFACE:	Bar code interfaces with Matthews M-pyre™ Advanced PLC control panel for procedural checks and balances. If Authorization, Identification and Time of Death are not documented, the Cremation equipment can be programmed not to allow a cycle to start until this information is correctly reported.
SECURITY:	Managers and owners can feel confident that cremations are being handled in a timely, organized, and efficient manner. This program documents the cremation handling process from beginning to end to insure you are delivering the proper cremated remains back to the family with documented proof for every step of the way.
INTEGRATION:	There is a suite of management tools which allows you to easily import business data into the SRS crematory manager, eliminating double entry and reducing the possibility of mistakes.
STANDARD PACKAGE:	
Software: SRS Crematory Manager	
REPORTS:	<ul style="list-style-type: none"> Accounting Activity Statement Current Cremations Service Report
APPLICATIONS & FORMS:	<ul style="list-style-type: none"> Cremated List Cremation Authorization State Cremation Permit Delivery Receipt & Return Receipt Status Report
