

Tech Specs

System Requirements

Using a Server

Operating System: SRS modules are compatible with a Windows OS. The following OS's include all versions 32 or 64 bit:

- Windows Vista
- Windows 7
- Windows 8
- Windows Server 2008
- Windows Server 2012, 2016

Hardware requirements: vary based on OS. Storage space would vary based on the volume of data and images.

- Minimum of 2 GB of RAM
 - 3 GB or more recommended.
-

Workstation Requirements

Operating System: SRS modules are compatible with a Windows OS. The following OS's include all versions 32 or 64 bit:

- Windows XP (*must have service pack 3*)
- Windows Vista
- Windows 7
- Windows 8, 10

Hardware Requirements: vary based on OS. Storage space would vary based on the volume of data and images.

- Minimum of 2 GB of RAM
-

Using our Virtual Server: the SRS Cloud

The SRS Cloud Solution is available for clients who wish not to use a server, want their database on their home machines without remoting in to the server, and would like instant backup on their SRS database. All of SRS' products can reside on the SRS Cloud.

Access:

You are now able to run your SRS software on the SRS Cloud via an internet connection from any computer, as long as the module is installed on that computer. Additionally, your active database can be accessed from your iPad, iPhone, or Android device. Your calendar of events can also be synced to an iCal, Google Calendar, or Outlook!

Why:

The SRS Cloud Solution provides clients with the mobility to access their data on many devices. The SRS Cloud will not only save users on time, but also on cost of hardware and maintenance fees versus using an in-house server.

- Mobility
- Efficiency
- Reduce Hardware Cost
- Reduce Maintenance Cost
- Vendor Security
- Portability

Cloud Requirements: Must have an internet connect to access the SRS Cloud.

- We recommend a network connection of a minimum 1 Mbit Download/.25 Mbit Upload. Most connections are typically faster. The faster your connection, the faster your performance.
- You can test your internet speed by going to www.speedtest.net and click Begin Test.

SRS Additional Features

Below are features available for additional purchase for your SRS modules. For pricing, please call 1.800.797.4861

	Procession <i>for Funeral Homes</i>	Phoenix <i>for Crematories</i>	InStone <i>for Cemeteries</i>
E View Organize your checklist of tasks in the program! Schedule calendar that can sync to your mobile device!			
Form and Report Generation Custom Docs, Authorizations, and your Contract. Never leave the program to create a document.			
V Files Electronic Filing Cabinet to go paperless. We can even back it up for you!			
Accounting and Vendor Exports Export to your accounting software and Online Stationary and Obituaries! No more double-entry!			
SRS Full Accounting Print checks from the software. This will also automatically debit and credit the proper accounts.			
PN + AN in One Don't use 2 separate programs, it's all done in 1! Just enter a date of death to switch and print your PN to AN Sales Report!			
Printed Materials Of course we have them! You can use our templates or create your own.			

	Procession <i>for Funeral Homes</i>	Phoenix <i>for Crematories</i>	InStone <i>for Cemeteries</i>
<p>Profile</p> <p>Family-friendly arrangement software! Showcase your merchandise in our Virtual Showroom!</p>			
<p>Capture</p> <p>Lite SRS web-based version for smartphones and tablets. Create a First Call on the fly!</p>			
<p>Family Capture</p> <p>Email a link for family members to input data. Spend more time during Arrangements focusing on them, not data entry!</p>			
<p>Trust and Commissions</p> <p>Record trust contracts, setup withholdings, set commission rates for staff and track commissions paid!</p>			
<p>Data Transfers</p> <p>It's not fun or easy, but we're pros! Don't lose all of your data, just put it in a new program.</p>			
<p>Portal</p> <p>Electronic white board! Data flows from the software and it refreshes every 5 minutes, just like Arrivals/Departures in an airport!</p>			
<p>Geographical Mapping</p> <p>Interactive, customized map of your cemetery! You can quickly see which graves are reserved, available, etc.</p>			
<p>Work Orders</p> <p>Track the completion of tasks assigned to each staff member. Historical records available for work orders completed for any location!</p>			
<p>Bar Coding</p> <p>Keep track of every decedent in your care! Scanners or a smartphone App are used to track throughout the entire cremation process.</p>			
<p>Matthew's M-Pyre</p> <p>Sync Bar Coding and the Matthew's M-Pyre 2.0 control system! Applicable to human and pet cremations.</p>			

Service Program

The Annual Service Program is provided for any client. Technical/IT support is unlimited for any support you need. Also included in the Service Program is our Live Updates. These are sent every 3-4 weeks as constant updates to your SRS software, as well as bug corrections and improvements.
